

AI & Machine Learning Internship

Overview

The AI & Machine Learning Internship at Spizatech Electrifying Life Pvt. Ltd. is a hands-on, project-based program designed for students, graduates, and professionals looking to build foundational skills in artificial intelligence and machine learning. It blends theoretical concepts with real-world implementation using industry-standard tools.

Objective

The internship covers key areas such as data preprocessing, algorithm development, model training, and evaluation, enabling participants to solve practical problems in domains like healthcare, finance, and automation.

Key Modules

- Introduction to AI & ML
- Python for Data Science (NumPy, Pandas, Matplotlib)
- Supervised & Unsupervised Learning
- Model Training & Evaluation
- Real-World Projects: Image Classification, Predictive Analytics
- Project Work

Outcomes

Participants will build ML models, complete a hands-on project, and be prepared for careers in AI, data science, and intelligent systems.
